SKILLS

- **Certifications:** AWS Certified Solutions Architect – Associate (July 2025)
- **Programming Languages:** Python, Java, Kotlin, C, JavaScript, HTML, CSS, R
- **Frameworks:** Node.js, React, FastAPI, Bootstrap, JavaFX
- **Databases:** DynamoDB, Firebase, MongoDB, MySQL, PostgreSQL

WORK EXPERIENCE

Corporate Strategy Analyst Intern | Aquanow | Vancouver, Canada Apr 2024 – Aug 2024

- Retrieved cryptocurrency market data via CoinGecko APIs in Python and stored data in structured CSV formats.
- Utilized **Pandas**, **NumPy**, and **Matplotlib** to analyze trends and created visual reports for client presentations.
- Conducted market and industry research to generate strategic insights for internal and external stakeholders.

Administrative Assistant | Jpcanada | Vancouver, Canada Oct 2021 – Jul 2023

- Organized client data to assist study permit applications and produced reports on visa approval rates and processing time using Google Sheets and Excel to provide insights for internal teams and client guidance.

Midwife | JCHO Yamatokoriyama Hospital | Nara, Japan Apr 2017 – Mar 2020

- Managed sensitive patient data and coordinated task scheduling and resource planning for labour and delivery.
- Coached newly hired midwives to acquire familiarity with working environment and duties quickly.

PROJECTS

pos-integrator | Stocky AI Apr 2025 – May 2025

- Developed a FastAPI endpoint to fetch POS data from Square and Clover APIs on demand and stored it in a Docker-hosted PostgreSQL database with a unified schema for seamless integration into Stocky AI's production system.
- Collaborated with Principal Engineers to develop **Pytest** unit tests ensuring the robustness of the integration work.
- Participated in a 5-week **Agile** sprint, joining daily stand-ups and weekly reviews led by Principal Engineers.

ReloCash | <https://github.com/misuzu-taniguchi/ReloCash> Feb 2025 – Apr 2025

- Built a full-stack marketplace for movers in a team of three using **JavaScript** and **Node.js**, hosted on **Amazon EC2**.
- Integrated user authentication via **Amazon Cognito**, storing customer/item data in **DynamoDB** and photos in **S3/EFS**.

Asset Tracker | <https://github.com/misuzu-taniguchi/asset-tracker> Sep 2024 – Oct 2024

- Developed an asset tracking web application using **React** and **Firebase** to manage multiple accounts.
- Implemented account-specific filtering, dynamic price updates, and account trend visualizations with **Plotly.js**.

Oishii Ramen | <https://github.com/misuzu-taniguchi/COMP-2522-Oishii-Ramen> Mar 2024 – Apr 2024

- Crafted **Java**-based Ramen store management game with a partner, utilizing **JavaFX** for the interface design.
- Applied advanced OOP principles to optimize software design and enhance the functionality and maintainability.
- Created and executed 127 **JUnit** tests to ensure code reliability and robust functionality.

helpER | <https://github.com/misuzu-taniguchi/DTC06-helpER> Sep 2023 – Dec 2023

- Built a mobile-friendly web app with **HTML**, **CSS**, **JavaScript**, and **Bootstrap** to help users find ERs and join waitlists.
- Utilized **Firebase** for efficient data storage, enabling seamless user experiences for storing and retrieving information.
- Led the team project through the full development lifecycle to ensure deadlines were met and objectives achieved.

EDUCATION

Computer Systems Technology, Diploma | **Cloud Computing option** | CGPA 90% Sep 2023 – Dec 2025 (est.)
British Columbia Institute of Technology – Vancouver, Canada

Bachelor of Science in Nursing Apr 2012 – Mar 2016
Kyoto University – Kyoto, Japan
